EDUCATION

Bachelor of Engineering in Computer Engineering 2024 – 2028 (Expected)
Lok Jagruti University, Ahmedabad, Gujarat
Currently in Semester 4

PROJECTS

GeoSpatial-Site-Readiness-Analyzer DA-IICT Hackathon 2026

- Developed a geospatial business site analyzer using React.js and Python to evaluate locations based on demographics, competition, and transport accessibility.
- Generated real-time business readiness scores with interactive data visualization.

WebWheels Sem-3 (Group Project)

- Built a full-stack vehicle marketplace using Flask and SQLite supporting multi-user transactions.
- Implemented AI assistant integration using Groq API for recommendations and pricing analysis.

Wheels and Deals Sem-2 (Group Project)

- Designed a Java-based car marketplace with MySQL (JDBC) supporting role-based access and CRUD operations.

Store Management System Sem-1 (Group Project)

- Implemented a Java-based grocery management system supporting efficient product catalog operations using OOP principles.

Bank Management System Sem-1 (Individual Project)

- Engineered a Java-based Bank Management System enabling account creation, transactions, and loan processing.

SKILLS

Programming Languages	Java, Python, JavaScript, SQL
Web Development	HTML, CSS, React.js(Basic), Node.js, Flask, Bootstrap, REST API
Libraries/Frameworks	Pandas, NumPy, Matplotlib, Scikit-learn
Database	MySQL, SQLite
Core Concepts	Data Structures and Algorithms (DSA), OOP, DBMS
Tools	Git, GitHub, VS Code

CERTIFICATIONS

Oracle Cloud Infrastructure AI Foundations - Oracle	View Credential
Hackathon Participant — TIC Tech Toe 2026 (DA-IICT)	View Credential
Foundations: Data, Data, Everywhere - Google	View Credential
Introduction to Java - Coursera	View Credential
Inheritance and Data Structures in Java - Coursera	View Credential
Introduction to HTML, CSS and JavaScript - Coursera	View Credential
